06 Collaboration with Tanssi Network for rapid development

Magnet leverages the development tools provided by Tanssi to enhance efficiency and enable quick implementation of logic. It also becomes a ContainerChain of the Tanssi Network, utilizing Tanssi Network's collators to assist in network formation. With the support of Tanssi and Polkadot, Magnet will achieve stable and secure operations, providing reliable services.

07 Scalability through parallel deployment

Magnet plans to deploy multiple docking stations in parallel to achieve scalability and expansion.

08 Inter docking station communication via XCM

Communication between different docking stations will be supported by XCM V3. The platform will develop XCM auxiliary tools to auxiliary cross-platform contract invocation.
